ISIoT 2022

4th International Workshop on Intelligent Systems for the Internet of Things

Marina Del Rey, LA, California
May 30 to June 1, 2022

colocated with DCOSS 2022

Workshop Co-Chairs
Vasos Vassiliou
University of Cyprus

Kyriakos Vamvoudakis
Georgia Inst. Of Technology

Zinon Zinonos
Municip. of Paphos

Scope

The ISIoT workshop aims at bringing together researchers and practitioners designing and deploying systems that apply **intelligent technologies in IoT**. Topics of interest include, but are not limited to:

- Computational Intelligence for the IoT
- Performance evaluation for the IoT
- Machine Learning in IoT and Smart Systems
- Fuzzy Logic in IoT and Smart Systems
- Dependability and Fault Tolerance in Smart Systems
- Big Data and Data Mining for the IoT
- Intelligent Network Technologies for the IoT
- Swarm and Multi-Agent Models for IoT
- Embedded Multiagent Systems
- Automatic Control for IoT
- Collective and Collaborative Robotics
- Robotics for the IoT
- Educational Robotics and IoT
- Computer Vision and IoT
- Applications of the IoT
- Smart Systems in Different industry verticals
- IoT platforms
- Blockchain for the IoT
- IoT Intrusion Detection
- Trust and Privacy in IoT
- Cloud Computing for the IoT
- Data Fusion from the IoT
